

IM3180 Design and Innovation Project (AY2025/26 Semester 1)

Individual Report

Name: Tan Yee Ann

Group: IE08

Project Title: DeciWise

Contributions to the Project and Report (1-2 pages)

Project

- Scenario Interface/Playthrough Development
- Analytic Engine Development
- Report Interface Development
- Report Interface Optimization
- Implementing Token Checking into the system/platform
- Investigating of passing of data into database
- Research on database options
- Assisting in research on Psychological Archetypes
- Research on Crisis Management
- UI/UX Flow Analysis
- Improving frontend UI
- Frontend Debugging
- Creating and updating Jira

Report (indicate pages and appendixes written by you for the Group Report)

- 6. Conclusion and Recommendation Work
- Appendixes A, B

Other Deliverables like Project Charter (indicate pages and appendixes), Poster, Presentation Slides (indicate slide numbers) and Video, if applicable

- Assisting in storyboarding for video
- Video Production (Actor)
- Touch-up on presentation slides

Reflection on Learning Outcome Attainment

Reflect on your experience during your project and the achievements you have relating to at least two of the points below:

- (a) Engineering knowledge
- (b) Problem Analysis
- (c) Investigation
- (d) Design/development of Solutions
- (e) Modern Tool Usage
- (f) The Engineer and the World
- (g) Ethics
- (h) Individual and Collaborative Team Work
- (i) Communication
- (j) Project Management and Finance
- (k) Lifelong Learning

Point 1: Individual and Collaborative Team Work

Through this project experience, I have learned that teamwork is very essential. The project consists of multiple different things and requirements to be completed, some of them would not be able to fully fulfil their role without the other being completed. For example, the analytic engine that shows the analysis of the user's performance, it would not fully fulfil its purpose if the backend function was not completely developed by Chloe to store tracked data of users into the database. Vice versa, in terms of cost-efficient workflow, the development of that backend function only started after the analytic engine was implemented, hence Chloe was able to work on something else in the project.

Individually, I am in charge of developing the analytic engine, report interface and scenario interface. I also made user interface improvements and debugging for the frontend pages of the system. I am delighted to have been in the exposure to React and Python and programming languages and frameworks such as Flask. Through this project, I have a stronger inclination to develop my coding knowledge and sharpen my skills in the field of software development and I intend to continue to further develop this project.

Point 2: Engineering Knowledge

In this project, I was exposed to Flask. Flask is a lightweight and powerful web framework for Python. I have heard of Flask but have not used it before until this project. I am still not very familiar with it, but I am glad that I was able to have some hands-on experience with it and I intend to learn and utilize it more. I am also delighted to have been in the exposure to React and Python again. I have personally seen how a system can be robust when everything comes together, it is like a body where each part has its own function. My inclination to develop my coding knowledge and skills grew because of this project and I intend to continue further work on this project.

I have also learned it is essential to do foundational research on different programming frameworks and it takes time to be more competent, hence I shall not give myself unrealistic expectations to quickly learn new programming languages.

Acknowledging/Declaring the Use of GAI

Please refer to NTU's Current Policy & Guidelines on the Use of Generative AI available in NTUlearn home page and the link:

[https://entuedu.sharepoint.com/sites/Student/dept/ctlp/SitePages/Exploring-the-Impact-of-Generative-Artificial-Intelligence-\(GAI\)-Tools-on-Education.aspx](https://entuedu.sharepoint.com/sites/Student/dept/ctlp/SitePages/Exploring-the-Impact-of-Generative-Artificial-Intelligence-(GAI)-Tools-on-Education.aspx)

- Complete the following declaration if applicable.
- Create a Paper Trail to document the input prompt, output obtained, and how you have used it

I _____ Tan Yee Ann _____ (student name),
_____ ytan276 _____@e.ntu.edu.sg (NTU email) honestly and sincerely make the following declaration in relation to the following course submission:

1. Name of course: Design & Innovation Project
2. Course Code: IM3180
3. Instructor: Prof Andy Khong
4. Title of Assignment/Project Submission: DIP Individual Report

In relation to the foregoing I hereby declare that, fully and properly in accordance with the Assignment/Project Instructions I have (check where appropriate):

- i. Used GAI as permitted to assist in generating key ideas only. ☐
- ii. Used GAI as permitted to assist in generating a first text only. ☐
- And/or
- iii. Used GAI to refine syntax and grammar for correct language submission only. ☐
- Or
- iv. As it is not permitted: Not used GAI assistance in any way in the development or generation of this assignment or project. ☒

I also declare that I have :

- a. Fully and honestly submitted the digital paper trail required under the assignment/project instructions; and that
- b. Wherever GAI assistance has been employed in the submission in word or paraphrase or inclusion of a significant idea or fact suggested by the GAI assistant, I have acknowledged this by a footnote; and that,
- c. Apart from the foregoing notices, the submission is wholly my own work.
