

IM3180 Design and Innovation Project (AY2025/26 Semester 1)

Individual Report

Name: Yong Hui Qi

Group: IE08

Project Title: DeciWise

Contributions to the Project and Report (1-2 pages)

Project

My contributions were focused on the conceptual and communication aspect of the project. I conducted research on PR, psychological and decision-making frameworks, which builds the foundation of Deciwise to structure the flow of scenarios and for its analytic engine. Based on the research of the many different well-established frameworks, I chose models that complement one another to structure the context of the crisis during the simulation playthrough and to analyse the individual's thinking process.

I developed the 5 key psychological dimensions for the analysis report for trainers to better understand their trainees' decision profile. I led the naming and logo branding of Deciwise. I delivered presentation, designed the A3 project poster and the presentation slides

Report (indicate pages and appendixes written by you for the Group Report)

3.6 Related studies on AI-assisted storytelling or psychological simulations

Appendices C

Other Deliverables like Project Charter (indicate pages and appendixes), Poster, Presentation Slides (indicate slide numbers) and Video, if applicable

Designed the A3 poster, Presentation slides (7-15, 18, 21, 22)

Brainstormed video scene flow, storyboarding and narration voice cover

Reflection on Learning Outcome Attainment

Reflect on your experience during your project and the achievements you have relating to at least two of the points below:

- (a) Engineering knowledge
- (b) Problem Analysis
- (c) Investigation
- (d) Design/development of Solutions
- (e) Modern Tool Usage
- (f) The Engineer and the World
- (g) Ethics
- (h) Individual and Collaborative Team Work
- (i) Communication
- (j) Project Management and Finance
- (k) Lifelong Learning

Point 1: (h) Individual and Collaborative Team Work

Through this DIP project, it taught me the beauty and importance of interdisciplinary teamwork which is definitely useful for me for my future group projects and in my future career. Through this collaboration, I learnt the importance of a combination of non-technical and technical aspects such as conceptual development, technical coding, project management and communication work hand in hand for a successful project. I enjoyed working in teams as I got to experience how every one of us have unique strengths and take on different domains of the project, we work towards and fulfil the same common goal in mind. Seeing how my research formed the analytics of decision-making profile and flow for the context of scenarios and options, gave me a strong sense of contribution to our team's shared outcome.

Point 2: (i) Communication

This project also strengthened my skills to communicate our project in visual, presentation and writing. The development of product branding, designed project poster, video storyboarding and presentation all need to be concise and audience-friendly to better communicate our project for better understanding. I learnt to better communicate the complex research ideas in simple and engaging ways during the presentation for panellists to easily understand the technical features and psychological groundings in Deciwise. Thus, allow me to learn the value of storytelling and clarity in communication. I also learnt that communication with a team is extremely important to not only avoid misunderstanding, but to understand my fellow teammates on a deeper level such as style of working, which will increase efficiency of the team's progress. As it was through the effective discussions among the team so that everyone agreed and could progress with the ideation and development of Deciwise.

Acknowledging/Declaring the Use of GAI

Please refer to NTU's Current Policy & Guidelines on the Use of Generative AI available in NTUlearn home page and the link:

[https://entuedu.sharepoint.com/sites/Student/dept/ctlp/SitePages/Exploring-the-Impact-of-Generative-Artificial-Intelligence-\(GAI\)-Tools-on-Education.aspx](https://entuedu.sharepoint.com/sites/Student/dept/ctlp/SitePages/Exploring-the-Impact-of-Generative-Artificial-Intelligence-(GAI)-Tools-on-Education.aspx)

- Complete the following declaration if applicable.
- Create a Paper Trail to document the input prompt, output obtained, and how you have used it

I , Yong Hui Qi (student name), YONG0268@e.ntu.edu.sg (NTU email) honestly and sincerely make the following declaration in relation to the following course submission:

1. Name of course: Design & Innovation Project
2. Course Code: IM3180
3. Instructor: Prof Andy Khong
4. Title of Assignment/Project Submission: DIP Individual Report

In relation to the foregoing I hereby declare that, fully and properly in accordance with the Assignment/Project Instructions I have (check where appropriate):

- i. Used GAI as permitted to assist in generating key ideas only. ☐
- ii. Used GAI as permitted to assist in generating a first text only. ☐

And/or

- iii. Used GAI to refine syntax and grammar for correct language submission only. ☐

Or

- iv. As it is not permitted: Not used GAI assistance in any way in the development or generation of this assignment or project. ☒

I also declare that I have :

- a. Fully and honestly submitted the digital paper trail required under the assignment/project instructions; and that
- b. Wherever GAI assistance has been employed in the submission in word or paraphrase or inclusion of a significant idea or fact suggested by the GAI assistant, I have acknowledged this by a footnote; and that,
- c. Apart from the foregoing notices, the submission is wholly my own work.

Yong Hui Qi
